"Caution To The Wind"

Visit "[Caution To The Wind](#)" on MotoLyrics.com

Each time I tell myself to take it slow
Let it smolder that fire below
Play it cool let the emotions simmer down
Remember the last time that she came around

'Cause sooner or later that knife is gonna twist
Fool myself to believing it's an innocent kiss

Chorus:

Then your eyes pierce the dark
Send a message in the night
Baby is it hard to remember
I'll be holding my own then your voice comes on the
phone
Then you touch me and it's caution to the wind
Baby tonight we'll throw caution to the wind

So hard to live this kind of life
They say I'll forget you - by and by
I got this habit never learning from the past
Hearts lie shattered on the street like broken glass

The more that I see you the harder it gets
Now I'm reaching the red line and it's harder to hit
the brakes

Then your eyes pierce the dark send a message to the
night
Baby those were nights to remember
Now we stand face to face and there's just no hiding
place
Then you touch me and it's caution to the wind
Baby tonight we'll throw caution to the wind

Then your eyes pierce the dark send a message to the
night

Repeat chorus.
