Look at you
Look at me
Look at who
We could be
I wanna know
Who you are
What you want
From the start
And every time I look at you I can hardly say a thing
My head starts to spin
And it hits me then
I love you
And every time you look at me I could go crazy but I
don't say it but I won't
Cause I'd rather be alone
Than lose you
And all I really wanna do is be next to you
But I'm too tired to fight
And I could tell you now
But baby never mind
All the time
Everyday
There's nothing I can do baby
To make you go away
So look at you
And look at me
And think of who
We could be
And every time I look at you I can hardly say a thing
My head starts to spin
And it hits me then
I love you
And every time you look at me I could go crazy but I
don't say it but I won't

Cause I'd rather be alone
Than lose you
And all I really wanna do is be next to you
But I'm too tired to fight
And I could tell you now
But baby never mind
All I really wanna say is I need you, babe
But how could you understand
What happens if you turn away
And everything turns blue and gray
And I just wish I told you never mind
And I could tell you now
But baby never mind
Yeaah
Oh yeah
I could tell you now but never mind
Yeah
Oh yeah yeah
And I could tell you now but never mind...
