Fuck this whole fucking world  
I want to see everything die  
Life should wither away slowly  
A long, slow, painful decay

Mankind is a repulsive blight on the Earth  
Our blood should fill the oceans  
Let all life suffocate  
Life is meaningless

This Earth should breathe no more  
Nothing deserves to live  
Molten rock will blot out the sun  
All vegetation will rot  
The living will starve to death

Humans will suffer... suffer... SUFFER!

This entire planet shall become a lifeless ball of rock!

[Solo]

Praise destruction!  
Hail death and decay!  
Welcome total extinction of life on Earth  
Let the sun go nova

Obliterate the universe  
Welcome the end of consciousness  
Return to the utter nothingness  
Nihilistical absolution

Let everything die...  
... slowly.
