I told them I ain't know you rap nigga you cold blooded  
The way you busted his flow wasn't slow was it  
My nigga was flipping, he grabbed that mike and was  
ripping  
Until some idiots was tripping, and then I heard bullets  
whistling  
That I said, just wanna celebrate  
He laughed, he said he's writing a song called reno  
911 straight on they ass  
As far as words go, it's crazy, them were the last I  
heard he  
Emj on this emotional musical journey

Come ride with me, it's so sad you say, so ride with me  
So joy with me, let share with this world it's a live of my  
dreams  
We won't be gone for long, I promise you won't be  
alone  
Words of the song, I met Michael Jones, on this  
emotional music journey

That was my, nigga in the bunk right across from mine  
Cracking them jokes like all the time  
Hopping on stage with him every night  
And why niggas would ever wanna take somebody's  
life  
Who's living it like a shinning light  
Man, all the homie ever did was smile  
I still don't understand it, don't think I ever will  
Why I could have been the bitch nigger that god had let  
get killed  
Instead they took Emj away it's safe to say  
I'll see your face again someday I probably gaze  
But I hold you in my heart until

At time I'm like yo Emj, where you been  
I know you looking down on me like here I am Kutty  
And I ain't wanting for nothing homie  
Don't more to do nothing for me  
Your love is enough the story is glory,  
Giving thanks to why you didn't lose a partner,

You gained a gangster for life  
In your heart I exist, but the music I'm able to live  
I see the way you fuss me all in your wrist  
And that's what's up man

Come ride with me, it's so sad you say, so ride with me  
So joy with me, let share with this world it's a live of my  
dreams  
We won't be gone for long, I promise you won't be  
alone  
Words of the song, I met Michael Jones,

I seen a cruel bitch, man hunting Reno, Nevada  
She'll have you living your dreams, them take them all  
with no problems  
And dark alley ways, with devils wait for the shootout  
Out at someone who is special, I told my family about  
her  
My soul, his first tour, he told me tech was his hero  
And watched him from the crowd  
To then go rock the same theatre  
Step out of bounds and rounds can fly  
Behind casinos, on the night I never gambled and still  
lost it all in Reno

If I only had 8 bars, to come and deliver to you in the  
graveyard  
I'd stay guard, it's shitty for even releasing you behind  
the 8 ball  
The pain's hard, I know you got kiddies to carry your  
name on  
But I'm praying for them, so they don't end up just  
singing the same song  
I'm hearing it in my sleep, I'm hearing it in the wind  
There's whispers on the beat, screaming Emj where  
you been  
I promise everyone out here, sheds tears until he  
remembers  
High powered mayhem, Emj, Mayday's seventh  
member

I remember like it was yesterday,  
Show up in Reno, then we hit the casino  
When did we, we did the show and we was only  
Was only crying you and rock was on that homie  
Never should have left you lonely,  
No one ever thought there was complications rising  
The blood cot inside him, Emj died him like

Michael Jones, I miss you my nigger  
Hey Emj, still trying to cope with this

Still can't believe that you gone  
And I know I gotta be strong  
Revenge is mine said the lord  
So we gotta let him take control  
But lord knows that I wanna grab the guy  
And blow and watch head roll  
You was a talented man, I watched you, fans  
Shouted out where you been, people was all in the  
trance  
Then we step on stage, you say you killing them right  
You... laughing and joking  
Meanwhile I'm going through,  
Your album about to drop, plus you came,  
But you told me keep killing on them, I'ma be back,  
And it hurt me, that I lost my friend on this motion of  
musical journey

Hold up, roll up the swisher,  
Light up and paint the picture  
Only if painted different, I would have been there with  
you  
So instead of crying, I'd rejoice and pour us some  
liquor  
And, straight, I mix it with lemonade  
Feel like I should be ashamed  
I had to look ya mama dead in the face  
She told me everything was gonna be okay  
You told me if anything you should be on your way  
home, any day  
Soon as we all relax and the phone rings  
Heard her say it, I'm going crazy, it's crazy, I'm  
thinking maybe  
This maybe I'm misunderstanding what your lady was  
saying  
No, not you can't be serious,

Come ride with me, it's so sad you say, so ride with me  
So joy with me, let share with this world it's a live of my  
dreams  
We won't be gone for long, I promise you won't be  
alone  
Words of the song, I met Michael Jones.
