

Technicolour "Fireflies"

Visit "[Fireflies](#)" on MotoLyrics.com

All my life I've stumbled in the dark
Reaching out but finding only air
Air and space, space and time
Time and faith never seem to collide
In the distance I heard you breathe
I called out your name in a silent scream
Just like fireflies in the night
Dancing without light
Just like fireflies in the night
Lost and blind without a guide
Voices echo in the night
Skies open their wounds tonight
I find your hand I feel with my skin
In the darkness there is no sin
Just like fireflies in the night
Dancing without light
Just like fireflies in the night
Lost and blind without a guide
Air and space, space and time
Time and faith never seem to collide
Just like fireflies in the night
Dancing without light
Just like fireflies in the night
Lost and blind without a guide
