We could be more than all this  
Just like on TV  
Just like in the films  
Just like the books i've read  
With your eyes up in the sky  
And our thoughts in the stars  
Your life like a technicolour film  
In 3-D on a big screen  
Your life but how can you be sure  
You saw it all in black and white  
We could be more than all this  
I just know that we can  
But how could we even try  
Without electricity  
With our eyes up in the sky  
And our thoughts in the stars  
Your life like a technicolour film  
In 3-D on a big screen  
Your life but how can you be sure  
You saw it all black and white
