Today sunset's different  
Tension filling the sky  
Hell is now forever  
Satan's legions arise  
The bell is tolling seven times  
Sirens start to roar  
Legions ready for attack  
Hate wind starts to blow

Christians running like faggots  
In front of their dying mothers  
Satan's legions victorious  
Spreading Hate and Disaster  
Black War

Flaming flames of fire

Rising in the sky  
Hell has come forever  
To make humanity die  
The face of a great goat  
Staring with a smile  
The strong who signed the oath  
Killing the last weak alive

[Chorus]

We are Satan's legions, we're ready for the war  
After our final mission, your world will be no more

[Repeat first verse]

[Chorus]
