Can't escape all your worries
Endless sorrow, pain, and suffer
can't escape your emotions
enslavement by the world you choose

The struggle continues at the of pain
Peace can no longer rest in your mind
The world you choose is fucked already
so stop your dreaming and face reality

You work so hard, all for nothing

your dreams are shattered, your goals destroyed
No-one listens to what we stand for
so why even try to you really care

The struggle continues at the of pain
Peace can no longer rest in your mind
The world you choose is fucked already
so stop your dreaming and face reality.
