Outside my window a robin builds a nest  
At last winter's gone away to rest  
Once again the leaves have return to the trees  
I can just feel that soft summer breeze

There's magic in the air  
Winter's disappeared, it's summer

Children will be playing in the park  
Days will be longer till the dark  
Nights will be warm with star filled skies  
A perfect setting for a girl and a guy

There's magic in the air  
Green grass every, everywhere it's summer

Don't you know it's summer time  
And the livin' is easy oh, so easy  
Everybody sing summer time

Now that summer's here there be million things to do  
Vacation near or far, whatever pleases you  
Summer is the happiest season of them all  
So everybody get together and have yourselves a ball

There's magic in the air  
Green grass every, everywhere, it's summer

There's magic in the air  
Green grass every, everywhere, it's summer

It's summer time  
Magic in the air  
Green grass everywhere, oh, it's summer

Take a look around you  
It's summer time  
Magic in the air  
Green grass everywhere, oh, it's summer  
It's summer time
