

Teramaze "Dying World"

Visit "[Dying World](#)" on MotoLyrics.com

Chemical plants, spewing black toxic clouds
Barrels of pollutant and liquids
Rivers floating with debris and human filth
Animals suffocating
Syringes loaded with a global virus, helpless with HIV
There's only one source to save your soul
The rest will fall, fall to the hole
There is hope so start to care
The end of man is closing near
God gave us a free will to live or die
It's in our hands
Changing society, for the worse, are you too blind to see?
Judgement Day, is on the verge but no one seems to care
Don't go on destroying your soul, it's not too late to be saved
A dying world is to consume, is to consume your hope
There is hope so start to care
The end of man is closing near
God gave us a free world
Do we have to go destroy it all?
