"Evermore"

Visit "[Evermore](#)" on MotoLyrics.com

I know you can hear me, I speak to you everyday of my
life,
but these days, getting shorter, the older I get the
quicker time passes by.

I know it's not forever
and this I know, you light shines through the sin

The signs in the clouds, say I've loved you forever
I feel by my side, this long trip together
'coz it's you that I know, that carried my bad things
the signs in the clouds say I've loved you forever

We know, you embrace us,
you're holding us now, everyday of our lives
And we know, you're forever, and this we know
you're light shines through the pain

The signs in the clouds, say I've loved you forever
I feel by my side, this long trip together
'coz it's you that I know, that carried my bad things
the signs in the clouds say I've loved you forever

What can I say of all the things you have done?
but i know i have found the way today because of you

The signs in the clouds, say I've loved you forever
I feel by my side, this long trip together

The signs in the clouds came to hear you out
