"Everything To Me"

Visit "[Everything To Me](#)" on MotoLyrics.com

I'm a lot like you, we're mirror-like
We're so much the same, the same in you
And I respond to You today

You're alot like me, reflects of who I am
As far as i can see, I found in You
And it's so good to be loved
But all I say...

This is my time, not running away,
Cancel my fears nothing must stay

Round and round we go, the carousal of time
This world won't stop for me, but I'm not from this
world
And I'm so grateful Your still here
As long as I can pray, You'll meet me on my way
You've seen me through my days, embracing all my
fears
And all my problems start to fade, you held me all the
way

This is my time, not running away,
Cancel my fears nothing must stay

Although you may be numb, take this time to come,
You found mt revenue, and all along in thi long time
you
Held me all the way

This is my time, not running away,
Cancel my fears nothing must stay

For You're the one that did stand by me, you take away
Bad dreams inside me,
And all along you made that time, to get me through
my mind.
