Tell me does he ever stroke your body gently

Does he talk to you the way that I do

Does he look into your eyes and see his future

I know that I do when I'm loving you

He's been treating you like love is out of season

Girl there ain't no reason

You can have it all

What a woman needs

chorus

This is how my heart beats

When I am making love to you

Listen to the sounds of how much I want you

Let your body feel my groove

I wanna get deep in you

This is what a woman needs day and night

What a woman needs

You need understanding love and devotion

So let me put it into motion

This is what I'll do for you

I'll break you off the way that you like

I'll be the priest you call in the night

I'll keep it real

So baby what's the deal

He's been treating you like love is out of season

Girl there ain't no reason

You can have it all

What a woman needs

repeat chorus

Everyday will be sunshine

Cause what a woman needs

I'll give to you

Making love in the moonlight

I promise I will cherish you forever
