I don't mind if we never make it to where we're headed  
As long as we don't end up here

We need to find our own way  
Believe in something we half made

We're making good time  
Remember where we were last year  
Driving all around this tired town  
Looking for something to do and telling ourselves

We need to find our own way  
Believe in something we half made  
We need to find our own way  
Believe in something we half made

So many times i dreamt a normal life  
Seeing her at night and what it must feel like  
To wake up in my bed  
No ringing in my head  
It's been sometime  
It's been sometime

It's based on love  
We'll never know  
What the world could be  
Where this could go

Called home to say I'm doing better  
Think I've finally may have myself together

We need to find our own way  
Believe in something we half made  
We need to find our own way  
Believe in something we half made
