My guard fell for you today now I will surrender,
Take this prisoner make him something better

Reach down and pull me up don't let your captive go
'Cause love's wounds have made me weak can't stand
up on my own

(Chorus) Cause you bring me to my knees For you I'd
do anything

White flag flies above
This is what I've chosen
I'll change anything now that my pride is broken

(Chorus)
Cause you bring me to my knees
For you I'd do anything

The grace you give will always fill me up
and I'll savor every bit of that fortune
but if in time this love turns to dust
I pray I don't endure that torture

(Chorus)
Cause you bring me to my knees
For you I'd do anything

Can you show me how to feel again
I'll do anything you need my friend
and together we will always span time
for you I'd do anything....
