(M--Mitchell; L--DuBois)

night flights on a music ship / leading on a never
ending trip
we race the sun again and we chase the world
night flights on a midnight jet stream / riding the wind
from dream to dream
we race the world around and we chase the sun
sky divers touching down / to spread sweet thunder all
around
just one night to shake you loose / then on to take
another town
we see you in a fever / standing by the exit door
we'd like to ignite you / but a big bright bird waits to
take us for more
night flights on a midnight jet stream / riding the wind
from dream to dream
we race the world around and we chase the sun
riding a midnight runaway / watching the blue lights
fall away
we race the world around and we chase the sun
