"Stay"

Visit "[Stay](#)" on MotoLyrics.com

* Stay with me don't walk away
Take my hand I want you to stay
By my side
Night and day
Night and day

Every time I feel temptation
I close my eyes and I wonder
Where you are
Can you make me feel completely
Safe from harm

** If you long for someone
If you need anyone
Then just show me the way to your heart

* Repeat

Every time I feel sensation
I search my heart 'cause I know that's
Where you are
Come on out into the open
Be the one

** Repeat

* Repeat (x3)
