

Testeagles "Like No Other"

Visit "[Like No Other](#)" on MotoLyrics.com

Maybe this is your voice but you can hear another
Just listen to the voice and soon you will discover
The people round the world we're all just like each
other
We have this thing called life and life is like no other
Maybe this is your voice but you can hear another
Just listen to the voice and soon you will discover
The people round the world we're all just like each
other
We have this thing called life and life is like no other
Maybe this is your voice but you can hear another
Just listen to the voice and soon you will discover
The people round the world we're all just like each
other
We have this thing called life and life is like no other
You believe that life is for a sucker
But you can believe life is like no other
Tell this to your sister and your brother
You should believe life is like no other
You believe that life is for a sucker
But you can believe life is like no other
Tell this to your sister and your brother
You should believe life is like no other
You believe that life is for a sucker
But you can believe life is like no other
Tell this to your sister and your brother
You should believe life is like no other
You believe that life is for a sucker
But you can believe life is like no other
Tell this to your sister and your brother
You should believe life is like no other
You believe that life is for a sucker
But you can believe life is like no other
Tell this to your sister and your brother
You should believe life is like no other
Life is like no other
Life is like no other
Life is like no other
Life is like no other
