In pain there's a lesson - In blood there's a slithering  
form traveling  
Through the veins, Through the body, amending -  
Burnt skin and broken bones  
Don't deny it: we're all snakes at first, and then we  
change again  
We are the strangers of today - Reach out, forever in  
the dark  
In pain there's a moment in blood there's a final story  
written  
So the better you make me I'm less man and more  
machine  
Engaged in guessing, I'm lost for words - I'm never  
gone  
Reach out for the serpent - Washing the dirt of ages  
away  
Reach out for the serpent  
Ask yourself: is this worth a reversed evolution?  
We're acting like a tidal wave, crushing all that oppose  
us - Higher  
Face the final legendary terminal new world disorder  
Pain has hypnotizing voice and it calls your name -  
Higher  
So you want steady, you're gonna get steady  
So you want unsteady, you're gonna get unsteady  
Look away - Eyes turn black - it's raining now  
It's angry now, clawing it's way out  
And then I shove the sun onto the light - The silence  
comes  
My freedom comes from inside - Tension relieved  
And I save myself from you - Rescue me now  
And you'll find your way back home, to find what you  
look for  
Nothing, I said nothing - I guess I've always been stuck  
on the wrong side  
Snakehead, you can't see me - Wherever I go, you go  
along  
Break it, I said break it - Destruction will bring  
something new to the spectrum  
Poison, suck the poison - wherever you go, I go along
