Kill your death - you're infected
It's got you - penetrating to your body
Lasting worry - you will rot
Your desire - desire to stay alive

HIV - it's got into you...by sex or drugs

You're dying - slowly with the pain
You're leaving - quietly, it's awful
You're dying - world is ending for you
You're leaving - forever and alone

Live - modestly and fair
Stay - there is a hope
Live - and think about it
Kill - kill your death!

HIV - it's got into you...by sex or drugs

Kill your death! So kill it!
