"Unreal Delusions"

Visit "[Unreal Delusions](#)" on MotoLyrics.com

Falling from down above
With thoughts somewhere away
Dreamed-drowned image of interior
Forgotten in the winds of dreams

Through the visual angle of immortality
Wandering to the point of light
Unknown blaze fills the space
Of unreal delusions

Through the visual angle of immortality
Wandering to the point of light
Unknown blaze fills the space
Of unreal delusions

Somewhere far away
In everlasting time
With face towards the paradise
And back turned to the past

Unreal delusions of astral way
Unknown illusions fading away

Stars turned off
The moon went black
Dilemma of the mind
Vanishing into the dark

All is over
The spirit back in the body
Left alone to it's peace
And unreal delusions

Unreal delusions of astral way
Unknown illusions fading away
