"Gravity"

Visit "[Gravity](#)" on MotoLyrics.com

I'm strong, but I'm weak
I'm smart, but I'm stupid
I know, yet unsure
I'm free, but held captive

I've been scared, I've been scarred
I'm afraid of what we've become
Tried to hide, tride to fight
Build a rocket to fly sky high

But gravity is pulling me down, pulling me down to be
with you
Yeah, gravity is pulling me down, pulling me down
towards you
I can't escape the force of gravity no matter what I try
to do
I keep on running, yeah
I keep on running
I keep on running, but gravity brings me back to you

Heart of gold, hard as stone
I'm numb, but I can feel you
Head is clear of things we fear
I love you, yeah I loved you

I've been scared, I've been scarred
Being afraid of what we've becoming
Tried to hide, tride to fight
Build a rocket to fly sky high

But gravity is pulling me down, pulling me down to be
with you
Yeah, gravity is pulling me down, pulling me down
towards you
I can't escape the force of gravity no matter what I try
to do
I keep on running, yeah
I keep on running
I keep on running, but gravity brings me back to you

(Brings me back to you, brings me back to you)

I kept on hiding (but gravity brings me back to you)
I kept on fighting
I kept on running away from you
Why do I keep on coming back to you

Yeah, gravity is pulling me down, pulling me down to
be with you
Yeah, gravity is pulling me down, pulling me down
towards you
I can't escape the force of gravity no matter what I try
to do
I keep on running, yeah
I keep on running
