So first of all I think that we both know
From the start you weren't exactly see-through
And I, and I kept finding all your issues
And if you fall I won't be watching you
My eyes so tightly closed so many things to do
And I got issues of my own
And one of those things is finding my way home

So if it's up to us you only wanted be home with you
Well then it's up to us you only wanted to go home with
you

So where do I begin I shouldn't bother
You had it out for us one way or the other
So why, did I give you this heart with the impression
that you'd use it
Is it that piece on your chest or just that pretty face
I should've never looked up in the first place
And I'm slowly learning, learning these lessons
These useless intentions

So if it's up to us you only wanted be home with you
Well then it's up to us you only wanted to go home with
you

This isn't Milwaukee and you'll never know me
But I'm not content with this knowing your intentions
This isn't Milwaukee and you'll never know me
But I'm not content with this amusing you

So if it's up to us you only wanted be home with you
Well then it's up to us you only wanted to go home with
you
