If timing is everything then we have nothing.
And if we have nothing, we have nothing to lose.
It's in the blood, yeah, the blood.
Thanks to the breeders.
As we walked through these fields they taught us how
to feel.
You can't change anyone else but you could die trying.
You can't be anything else and that's just fine.
There are giants in the earth.
So long, everything revolves around us.
So what, everything revolves around us.
We'll keep you in our prayers.
