Bring it down until you hear
The haunted melody you've ignored
Drown out again
'Cause you're afraid
Sometimes we might just sing along

Run from who you are
Incomplete as though we start
Never sure who to be
You've become your enemy

These plastic dreams
Vivid in the play
They still dance with so much charm
Don't forget that when it ends
That this song will play on and on

Run from who you are
Incomplete as though you start
Never sure who to be
You've become your enemy

You've become your enemy
