Pillars supporting sky crumble  
Sun moon the stars pour down  
Rivers and oceans rush where the earth sinks  
Great conflagration quenched by raging flood

North and south polars  
Counterchange  
Screaming world  
Turning over  
Sky makes war with the earth  
Fragments fall down

And the darkness that follows

Rent  
In great  
Chasms

Tachylite lava from the abyss  
Turn into a pillar of vapour  
Great heat boil the sea  
Death of a continent

Enormous surge of water  
Wipe out humanity

Coming of ice  
A cataclysmic flood  
Destroys the advanced  
Mankind of high tech age

Wall of water  
Sweep across the earth

Wall of water  
Fossilize all
