Go!

Stop preaching at me

I don't wanna hear it

Your religion is shit

So fucking be it

Fuck your book of morals

Burn the fucking churches

Centers of corruption

Centers of hypocrisy!

Society society, moron society

Society society, we will not give in

Society society, moron society

Society society, we will not give in

Fashion it's all what you are about

Fuck you and your friends we are gonna beat you  
down!

Stop the bullshit, messing with our scene

Bloody poseurs you make us fucking sick!

Society society, moron society

Society society, we will not give in

Society society, moron society

Society society, we will not give in

[Interlude]

Society society, moron society

Society society, we will not give in

Society society, moron society

Society society, we will not give in

Fight for the cause against this hoax!

Reject the lies and media control!

You are your own human being, you got the power, you  
got the control!

Society society, moron society

Society society, we will not give in

Society society, moron society

Society society, we will not give in
