You can't win them all they say  
Best you speak up loud enough before you  
Before you fall too far away  
Before you're completely frayed  
Or too deeply swayed cause

I'm lovesick and waiting  
For the day when you make everything brand new  
But my heart's grown hard from a hope that's lost  
All weather tossed, all sore and cross

Pre-Chorus

So now the fruit is falling off the tree  
A bit too fast like a hit from a moving fist  
I just don't want to feel like this  
Oh there must be something I've missed  
Since I've been

Chorus

Running around painting this old town  
Been wracking my brain wondering what's changed  
But I've really only been looking for you  
Yes I've really only been looking for you  
So I guess I'll go turn off my phone  
So we can be alone

So I'm trying to fix this sorry state  
In all the human ways, all the usual plays  
But all I've done is got worn out and weakened by my  
doubt  
Been weakened by my doubt

Pre-Chorus

Now the fruit is falling off the tree  
A bit too fast like a hit from a moving fist  
I just don't want to feel like this  
Oh there must be something I've missed  
Since I've been

Chorus

Running around painting this old town  
Been wracking my brain wondering what's changed  
But I've really only been looking for you  
Yes I've really only been looking for you

Running around painting this old town  
Been wracking my brain wondering what's changed  
But I've really only been looking for you  
Yes I've really only been looking for you  
So I guess I'll just go on home  
So we can be alone

So I'm waiting for you I am  
I'm waiting for you I am  
I am waiting for you I am  
I am waiting for you I am  
And I'm not

Chorus

Running around painting this old town  
Just wracking my brain wondering what's changed  
Cause I've really only been looking for you  
I've really only been looking for you

So busy busy busy bee  
Being everything I'm supposed to be  
That dizzy dizzy dizzy me  
Didn't leave enough time for us to breathe  
And now I'm here looking for you
