"Radio #2"

Visit "[Radio #2](#)" on MotoLyrics.com

meet me at midnite-
the broadcast tower
high above the hollywood sign
you bring your guitar
and ill bring my radio, radio

everyone will come
from miles around
to witness this beautiful site
we'll set five fires
pretend its the fourth of july

this is the starting of a brand new revolution
bite the hand that feeds
stand up and fight against the messages that theyre
sending
stop the frequency

youre always talkin
its never ending
its about time that we turned off the radio
call the request lines and tell them that its over

youre always playin
all of the same songs
over and over again
its about time that we all turned off the radio

well listen to bsides
and sing along to anthems of the years gone by
integrity and honesty will prevail tonite

when its all over
one question still remains
why do so many bands never make it to the radio

this is the starting of a brand new revolution
bite the hand that feeds
stand up and fight against the messages that theyre
sending
stop the frequency

youre always talkin
its never ending
its about time that we turned off the radio
call the request lines and tell them that its over

youre always playin
all of the same songs
over and over again
its about time that we all turned off the radio

look outside your fm dial
theyre preaching lies. and (?) for time
a generation without a voice and stripped of pride
