"The Way You Move"

Visit "[The Way You Move](#)" on MotoLyrics.com

I got this feeling in my bones
It chills me right down to my, down to my core

All we need now, in this game that we like to play
Is a secret to cover our mistakes

I love the way that you move and all the things that you
do
You can take all you want from me, I love the way that
you move

I'm famished with all your love, girl. I need it so
These pains won't help me hide it

I need to show affection in this game tht we like to play
You can take all you want from me, I love the way that
you move

I don't think I know what has come, come over me
I don't think I know, no
I don't think I know what has come over me
I don't think I know, no

I don't think I know what has come, come over me
I don't think I know, no
I don't think I know what has come over me
I don't think I know, no

I got this feeing in my bones

I love the way that you move and all the things that you
do
You can take all you want from me, I love the way, that
you move

I love the way that you move and all the things that you
do
You can take all you want from me, I love the way, that
you move
