

## The Automatic

### "Run and Hide"

Visit ["Run and Hide"](#) on MotoLyrics.com

Get into this moment, it won't get to you  
Well are you in or are you out?  
Keep a little composure when the walls come down  
Well, are you in? I hope your in

And oh, you know this place will look so much better  
when its broken  
And oh, I hope, we all trust your decision is the right  
one

Sharpen your eyes  
Never leave this house alone  
Get up, get up and stand your ground  
Faster than light, you'll settle in no time  
You'll only want to run and hide

What happened to concentration?  
I don't know how we are going to win  
I don't know how we are going to win  
Keep a little composure when the walls come down  
I don't know how we are going to win again

And oh, you know this place will look so much better  
when its broken

Sharpen your eyes  
Never leave this house alone  
Get up, get up and stand your ground  
Faster than light, you'll settle in no time  
You'll only want to run and hide

Sharpen your eyes  
Never leave this house alone  
Get up, get up and stand your ground  
Faster than light, you'll settle in no time  
You'll only want to run and hide
