

## The Avett Brothers "Colorshow"

Visit "[Colorshow](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Be loud let your colors show  
Try to keep the madness low  
If they hear and it's wrong  
And they come with torches on  
Yeah come on

Be loud let your colors show  
Try to keep the madness low  
I tell them no with my hands  
Make them understand the plan of it  
Bright and gone

And I'm done forever  
It's you and me forever  
Cause I'm done forever  
It's you and me forever

Be loud let the others know  
First a whisper then it grows  
I tell them go with my hands  
Make them understand the last of it  
Yeah come on, pain and all

Leave out pack your things and go  
Leave the baby makers home  
There's a time (now) and a place (now)  
Someone built to take the race  
When it calls you go head down

Head down don't you make a sound  
Keep your plans all to yourself  
They'll come true they follow you  
They're what you're obligated to  
Don't you listen to nobody else

And I'm done forever  
It's you and me forever  
Cause I'm done forever  
See it's you and me forever
