"Do Or Die"

I bring it black and white so you know what's right
Till you seein the light making the demons
Wanna run from the thief in the night
I bring it white and black till ya bringin it back
As a matter of fact you gotta step right back
Because ya under attack

Think hard before you make a decision
Discard livin your life in a prison
Don't stop always be the one ready to listen
We can't stop because we're livin life with a vision
Think hard don't create a division
Discard livin in true indecision
Don't stop always be avoidin the collision
We can't stop because we're livin life on a mission

Do or die
You can release all your foolish pride
He will be coming soon
You don't even care
Hear my cry
Facing the fear of my paradise
I'll search heaven for you
But you're not there

It's a test of time from ridicule to sublime
Life without crime life with nuff meaning 'n feelin divine
Not talkin about the birds and the bees
Not talkin about a pocket full of weeds
Not here to sell a million cd's but I know
What you need so let go and be free

Rest your head let go say you're sorry
Ease your mind resign to the the truth
