Punk sucks, just oi oi crap comes out of your face  
Let's throw down, but not in MY personal space.  
You walk around like you're so tough  
Now we're calling you out cause we've had enough.

Over 26 years that name's been around  
With a few open D's it's driven to the ground  
While disowning the names of the original bands  
You can take it for yourself and wash the blood from  
you hands  
Now you can whisper  
And spread the word  
Of a new kind of music that we've never heard  
As you destroy the remnants here's a tip:  
NEVER ABANDON SHIP!

Woah.
