Is anybody here, to hear this song  
That I've been crying here, all night long  
This feeling so alone, it feels so wrong  
Is anybody here to hear this song

Is this lonely voice  
The only voice to sing this song  
Is my guitar the only one to strum along  
Out my window in the street  
The shadow falls on a deserted town  
Where the people used to meet  
Now but never when the suns gone down

Can anybody see, what's going on  
Cuz everybody knows, the right from wrong  
Oh we could change it now, or go along  
Is anybody here to hear this song

Out my window in the street  
A steady rain is still a coming down  
Till the sun rises up again  
Will this world ever come around

Is anybody here to hear this song  
That I've been crying here, all night long  
This feeling so alone, just feels so wrong  
Is anybody here to hear this song  
Now is anybody here to hear this song  
This song
