Inject this silence in my head
Desecrate my innocence
I feel black cause there's no blue
All these feelings I never knew
A needle is your escape
To a much warmer place
This syringe bleeds for you
Breaks the skin and fills you through
Pain, pain go away
Left for dead so let me pray
Pain, pain go away
Let me know that it's ok
It's only a crime to mute the blind
This catacombs winding
The entrails defining
This tangled web
That I'm stuck in
Each step takes me
Further from the truth I am certain
Just stop where you are
I searched these ruins
In hopes to find
The answer to life's
Twisted design
Each parable is
A beacon sent
For cataclysmic innocence
A needle is your escape
To a much warmer place
This syringe bleeds for you
Breaks the skin and fills you through
This catacombs winding
The entrails defining
This 3 2 1
Each step takes me
Further from the truth I am certain
Just stop where you are
Stop where you are
(???)
Please to meet you, I wanna hold you close
Whiskey, whiskey? rose?
It's forty four miles to Amarillo

Whoa yeah
La da da da dum
