What you gonna do when I'm coming home to you will  
you hold me real tight  
I hope your only plan is to be my only man all night  
Lets kick it back baby stop the crazy get lazy and take it  
real slow  
Hide under the covers sexy lover make me shudder  
Turn the music down low  
You got me wrapped up you got me wrapped up good  
I feel the fire  
You got my heart baby just like I knew you would  
You've taken me higher  
Your love is better than the weather out in Hollywood  
You got me wrapped up good  
Wrapped up good  
Tell me this is going where I hope this is going boy  
don't let me down  
I can see forever when we're laying here together and  
there's no-one around  
Whisper in my ear tell me what I wanna hear we got  
nothing to hide  
Give me what I want cos the funds just begin and we've  
got all night  
You got me wrapped up you got me wrapped up good  
I feel the fire  
You got my heart baby just like I knew you would  
You've taken me higher  
Your love is better than the weather out in Hollywood  
You got me wrapped up good  
Wrapped up good  
You got me wrapped up you got me wrapped up good  
I feel the fire  
You got my heart baby just like I knew you would  
You've taken me higher  
Your love is better than the weather out in Hollywood  
It took one look and I was hooked and now it's  
understood  
You got me wrapped up good  
Wrapped up good  
Wrapped up good  
Wrapped up good
