(Verse)

Ever since I was 16 I wished that spring would come to me

And I wished that I could dance upon the aisles.

So with rivers on the stage of steam, I let my thoughts begin to dream

I held my breath and ran into the wild.

And each night the horizon grew and all of us saw just a few

Till mornings gold would make it disappear.

It's summer and my treasure chest has not forgotten what must forget

But that's a feeling for another year.

A movement has a way like words,

You're there before the ramies heard

And all that one can do is shake their eyes.

And miles of a forgotten dream

Be yours, my love, it's where we've been

And maybe one day soon we will arrive.

(Chorus)

Playing all night loud, playing all night loud

Singing all night with me

All night loud.

(Verse)

And we went on a world went trip

And that's on while the records flip

And still this came like chaos in the lights.

And voices like devotion flew

Across the sea from me to you

A music that I still cannot describe.

And there were ugly times, it's true,

Some from me and some from you

And devils have a way of digging down.

But a friend it's not a friend for life

Unless your life it's worth the strife  
So hold on, it'll be alright.

(Chorus)

Playing all night loud, playing all night loud  
Singing all night with me  
All night loud.

(Verse)

There's a speech that I know well  
It's told by Henry V,  
I'll tell a version that relates to us not one.

Who sheds his sweat with me  
Will be my friend eternally  
From this day till the ending of the world.

No matter if we're on the road  
Or in the sun, or in the cold,  
I hope I can remember your bright eyes.

Cause I know you and you know me  
At least somehow mysteriously  
So thank you, my dear friends, and that's goodnight.

I'm much obliged, I'm much obliged  
So thank you, my dear friends, and that's goodnight.  
I'm much obliged, I'm much obliged,  
So thank you, my dear friends, and that's goodnight.
