All alone  
Craters in my face, there she goes  
The prettiest planet in space  
Does she know?  
Does she even know that I exist,  
I'm up here  
In eternal love-struck orbit.

Someday soon,  
The earth will orbit the moon and, say  
She'll appreciate the things that I do,  
Like make waves  
And keep things pretty at night  
Understarlight forever  
We'll be together, alright  
Alright.

Floating  
Out in deep space is no fun and she's been  
Going 'round with the sun, she digs him  
She digs his light and his heat,  
Well that's fine  
Cause he's gonna burn out eventually

Someday soon,  
The earth will orbit the moon and, say  
She'll appreciate the things that I do,  
Like make waves  
And keep things pretty at night  
Understarlight forever  
We'll be together, alright  
Under starlight forever  
We'll be together alright,  
Alright.

All alone  
Craters in my face, there she goes  
The prettiest planet in space  
And they say  
Blue moons are exceptionally rare  
I don't know  
But I've been blue every day since she's been there

Someday soon,  
The earth will orbit the moon and, say  
She'll appreciate the things that I do,  
Like make waves  
And keep things pretty at night  
Understarlight forever  
We'll be together, alright
