I can see your shadow lying in the moonlight  
I can hear your heartbeat playing on my right side  
Every night I long for this, makin' up what I miss  
I can hear you breathing letting out a sad sigh

You tried so hard to hide your scars  
Always on your guard

Chorus

Don't, don't let me go  
Don't make me hold on when you're not  
Don't, don't turn away  
What can I say so you wont  
No don't, don't let me go...

I can see the skyline fading in the distance  
Tears are comin' down  
I'm trying just to make sense  
I don't listen to the radio just the engine and the road  
I wonder if my words are makin' any difference

I dream and then it seem to end  
But always come again

Chorus

I'm comin' down  
To where you're standing  
I need you now or you'll be watchin'  
Me hit the ground  
With crashing in...

Chorus

Don't let me go...  
Don't let me go...
