I said you dunno what the heck is going on tonight,
You said I'm outta my mind, way over my head.
We breakup, we break down, we drink up, we fool
around,
We breakup, we break down, we drink up and, get it on.

All I ever want is to be right next to you,
But everytime it falls apart coz
Crashing cars and breaking hearts is what we've been
about from the start.

So we're standing here right now,
And nothings being said.
Do you wanna stick around,
Or rather leave instead.

I said you don't know,
What the heck is going on.
