Nobody wants to go home now  
Giddey up, party down  
Waking up and it is very strange  
Everybody is going to know our name

Even though you've been gone so long  
I'll still stay here singing these songs  
Of love, oh yeah, as it rolls on by

Snowflakes falling on my motel room  
Gingerbread man been dancing around the moon  
And oh I've seen some crazy things  
Rain falling down and it melts my snowman

The wind blows down sandman and I'm mad  
I've been so much to see  
It will bring me down to where no one stays  
And just to stay

In the night again  
Bring back the night  
Take me out of this reality  
Make me get out of this reality

Too late to sleep, too early to rise  
And I'm wide awake in the middle of the night again

In the night again, in the night again  
Bring back the night  
Take me out of this reality  
Make me get out of this reality

Nobody wants to go home now  
Giddey up, party down  
Waking up and it is very strange  
Everybody is going to know our name
