"Fairy Dust"

Visit "[Fairy Dust](#)" on MotoLyrics.com

I wanna to take you to my favorite place
Oooh my favorite place
All it takes is just a little fairy dust
Just a little fairy dust

When the sun is on your face
When the clouds come out to play
When the moon has kissed your skin
You know you'll just want to stay

Red and green is my favorite driving machine
We're on our way, on our way to paradise
We're on our way to paradise

When the moon is on your face
When the stars come out to play
When the sun has kissed your skin
You know you'll just want to stay

Going to take you, take you, take you yeah
I wanna to take you to my favorite place
Oooh my favorite place
All it takes is just a little fairy dust
All it takes is just a little fairy dust
All it takes
All it takes is fairy dust in paradise
