We better get back up
We think we've got it hard
Life deals us a wildcard
We need pills we're so depressed
Because we can't choose between
Better or best
We better get back up
Before we have something to really cry about
We think we've got it hard
Life deals us a wildcard
We need pills we're so depressed
Because we can't choose between
Better or best
We better get back up
Before we have something to really cry about
And we cry cry cry
We better get back up
Before we have something to really cry about
