Look up, the cloudless sky is falling  
And you can't tell  
Wise up, leave while the leaving's good  
It served you well  
I know it's all too much to bear

Line up, single file in a line that stretches  
All through town  
I know I'm in denial but if we sing loud then  
We still make sound

Sized up, taken for what it's worth  
And that's not much  
Sing loud till hearts and heads are empty  
Our only crutch  
I know it's all too much to bear

How many of us are there?
