I don't want to go out it doesn't sound like fun
I don't really want to small talk with anyone
A night of awkward moments and useless talk
With people I don't really care about
Oh no not now
Information I can do without
You got a talkbomb going a talkbomb going right here
As it explodes again I'll cover my ears
I don't want to meet you
You don't want to meet me
Let's just cooperate and let each other be
We won't play best friends we know we're not
I don't need anymore right now I like the ones I got
Oh no not now
Information I can do without
You got a talkbomb going a talkbomb going right here
As it explodes again I'll cover my ears
