

The Crucified "Focus"

Visit "[Focus](#)" on MotoLyrics.com

The deficit, environment, a government corrupt
So many things to worry us and tangle our minds up
We know we're being taken, we know it all too well
We know that something must be done but there's
more to tell

Where are you going? what's your focus?
Losing your reason? for a...lie

Caught up in the cause, the fight, caught up in the roar
You know that your intentions are right in what you're
fighting for
But in the midst, the heat of it all, don't forget your
drive
We're hear to do the father's will our reason to survive

There's so much going on around us and we must be
aware
It's important that they see our love and that we truly
care

Oure time for lying dormant while the world is so in
need
Is over now but don't forget the purpose of your doing
