Sleeping moments giving birth
To a world of my own invention
Doubt is a cast, and what's real
Mixes with imatination
My imatination
Each vision, each word
Like a message in a bottle
The unreal has given birth
To the titans of my inner battles
Angel, burning away
Cutting against the heartless unforgiven
Anger, blacken my dream
A phoenix in flame, returning in redemption
Angel, burning away
Cutting against the heartless unforgiven
Anger, blacken my dream
I can see this angel is me
And I am in flames
The wind is breaking hard
Flowing with the void of fire
The light it burns
Eyes glow, holding my soul
The fallen horde is hunting seraph
Wisdom, Prometheus knows
A torch is but a tool for heroes
We stand to face the hatred
Amassing on our borders
