I find you, lying fetal, kness pulled beneath
Your chin, alluring bite sings empty promises,
The entropy has pulled you in, your heart
Pounds, your breathing is labored, foolish
Things we do for fun, the world outside caving
Inward, now what have you done? what have
You done?

No life, No love, No dreams, No reason to remain,
No eyes, No vision, No pain, No, No Nothing, No
Mind, No thought, No sex, No awe to feel, No
Heart, No Nothing, No, No, No Nothing

Fingers numb, a hand is reaching, asking, begging
For a friend, your mouth is dry sting cotton frothing,
Spiral staircase towards the end, chest heaves and
You stop breathing, numeric punch keys 911, bad
Chemistry, organic weakness, now what have you
Done? what have you done?

No life, No love, No dreams, No reason to remain,
No eyes, No vision, No pain, No, No Nothing, No
Mind, No thought, No sex, No awe to feel, No
Heart, No Nothing, No, No, No, No Nothing
