Yeah, it's a big bright beautiful world  
I just see other side of the door  
Six billion beautiful faces  
But I saw them all before

No, this is not about running out on you  
Not a case of right or wrong  
It's only that it's over and done for me  
It's already been and gone

And I don't want another go around  
I don't want to start again  
No, I don't want another go around  
I want this to be the end

I want this to be the end  
I don't want to start again  
I want this to be the last thing we do  
It's for me and you

For all my dreams came true

Yeah, I know I should care if you come with me  
Yeah, and I should care if you go  
I really should care about your love or your hate of me  
Yeah, I should care but I don't

And it's not about giving up on you  
It's not a case of do or die  
It's simply that it's over and out for me  
There's no more room inside

And I don't want another run around  
I don't want to start again  
No, I don't want another run around  
I want this to be the end

I want this to be the end  
I don't want to start again  
I want this to be the last thing we do  
It's for me and you

For all my dreams came true

Yeah, it's a big bright beautiful world out there  
Just the other side of this door  
Six billion beautiful faces await  
But I saw it all before

No, this is not about running out on you  
Not a case of right or wrong  
It's only that it's over and done for me  
It's already been and gone

And I don't want another go around  
I don't want to start again  
No, I don't want another go around  
I want this to be the end

I want this to be the end  
I don't want to start again  
I want this to be the last thing we do  
This to be it for me and you

This to be the last we go through  
This to be the end  
For all my dreams came true
